Point of Sale Intern

Motivated computer science student with a keen interest in specializing in data science. Currently interning at Steward Bank in the point of sale department, where I leverage my strong Python and JavaScript skills to contribute effectively to team projects. Highly conscientious and known for being a valuable team player, I bring a combination of technical expertise and collaborative spirit to every endeavor. Passionate about leveraging data-driven insights to drive innovation and problem-solving in real-world applications. See my GitHub projects at https://github.com/Mashyrano.

EDUCATION

Computer Science

Bindura University Of Science And Education
Bindura, Zimbabwe
08/2021 - 08/2025

WORK EXPERIENCE

Steward bank • Harare

Point Of Sale Intern • Internship

- Developed a Python program to automate an Excel process, specifically the VLOOKUP function, and generate daily reports. This automation saved at least one hour per day.
- Continuously seek opportunities to enhance processes through technology and AI.

Mining Company • Harare, Harare, Zimbabwe • 12/2022 - 01/2023
Stock Take Manager

- Muriel Mine, Mutorashanga Zimbabwe
- Utilized my advanced Excel skills to meticulously account for all items and meticulously organized a project board, clearly delineating each team member's responsibilities. As a result, we successfully completed the task two days ahead of schedule.

CERTIFICATIONS

AI and Workplace skills • 03/2024 - 05/2024

ALX

PROJECTS

Birth and Death certificate issuing System • 08/2022 - 11/2022

Bindura University of Science Education

Developed an automated system for issuing birth and death certificates, enhancing convenience by enabling users to apply from home. Utilized PHP, JavaScript, and HTML to create a user-friendly and efficient online application process.
